Preliminary New York 2004 Database

The purpose of this document is to provide an overview of the preliminary Coastal 2004 New York database. These data are available to Coastal 2004 Partners for purposes of verification and validation and are not meant for public dissemination. This database will not be finalized until laboratory analyses of samples collected in the field are complete. Field data are stored in a format closely based on field datasheets. These have undergone initial QA checks. However they do not constitute a final database.
